

## Exterior Sash Pocket Lamination Discontinued on All Double Hung Products

The exterior sash pockets on all double hung products will no longer be laminated. Eliminating lamination on this area provides the following benefits:

- Superior Aesthetics: Previously, the exterior lamination was visible from certain angles and the color was not consistent with the white vinyl exterior.
- Competitive Parity: Known competitors do not laminate this surface.
- Greater Durability: Placing interior grade laminate on the exterior had the potential for accelerated weathering.

This change will impact laminated double hung windows in all product lines. The discontinuation will occur as a running change as old inventory is depleted, and precautions will be taken to ensure that orders will not be mixed.

**NOTE:** Be advised that existing double hung samples will not be replaced in this discontinuation and will still feature the laminated exterior. As double hung field samples are depleted, they will be replaced by new samples that do not feature lamination in this coverage area.

## Lamination Added to Casement Screen Tracks

To enhance interior aesthetic appeal on laminated casement products, all casement screen tracks will now be laminated. The change will occur as a running change as old inventory is depleted. Precautions will be taken to ensure that casements orders are consistent.
