

9800 WINDOWS

**So inspiring, you might want to think about charging admission.**

With Simonton Impressions® 9800 windows, your house goes from being a home to a virtual art gallery. Simonton Impressions windows feature the look and style of classic wood windows, with the strength, energy efficiency and durability of vinyl. In addition, the durable fusion-welded construction and a variety of advanced, energy-saving glass packages, performance features and options truly make Simonton Impressions 9800 windows works of art.

## 9800 WINDOWS

**It's Good Being the Envy of Everyone.** From the smallest detail, Simonton Impressions® 9800 windows have been designed to increase energy savings, hinder weather penetration and provide low maintenance.

### 9800 Performance Features

**Welded Frame and Sash** Profiles are fused together to create a weathertight, one-piece unit.

**Simonton Sill®** The patented, triple-stepped, sloped sill design forces water away from the window.

**Lap-Lok® Meeting Rail** Overlapping and interlocking meeting rail virtually eliminates air and water infiltration where the sash meet.

**Multiple-chambered Profiles** Dead-air chambers inside vinyl profiles create small, airtight pockets for increased insulation.

**Dual Fin Weatherstripping** Creates a weather-resistant seal around operable sash.

**Chamfered Exterior** Chiseled frame design mirrors the look of high-cost wood windows.

**Coil Spring Balance System** Ensures easy sash movement and holds the window in any open position.

**Dual Air Loks™** Allow window to stay partially open for ventilation.

**Denny Clip™ Pivot System** Unique pivot bar keeps operable sash in perfect alignment.

**Curved Lift Handles** The gently curved design of the color-matched lift handles provide a streamlined interior look.

**ProSolar® Low E Glass** Helps keep warm air in during winter and cool air in during summer, all while blocking up to 84% of the sun's harmful ultraviolet rays.

**Intercept® Spacer System** U-channel design offers lower conduction rates and flexes with temperature fluctuations to reduce seal failure.

## 9800 Thermal Dynamics

**Making the best even better.** Featuring a 3/4" insulating glass unit, ProSolar Low E glass and an Argon gas fill, the standard glass package on Simonton Impressions windows offers impressive energy-efficiency. But advanced features in our optional glass packages can offer even greater energy-efficiency, comfort and safety.

### Sensor Glass®

An optional glass package that combines ProSolar Low E glass or

ProSolar® Shade with an Argon gas fill, a 1" double-strength I.G. unit and the Super Spacer® — a non-metallic foam spacer which is more thermally efficient than other types of spacer systems.

### Super Sensor Glass®

This package features a 1" insulating glass unit with three panes of double-strength glass that produce two separate air spaces for added insulation. Combine this with two layers of ProSolar or ProSolar Shade double-strength glass, Super Spacer and Argon or a heavier Krypton gas fill to achieve superior thermal performance.

### Super Sensor Plus Glass™

For the ultimate combination of energy efficiency and security, this remarkable glass package features a 1" I.G. unit with laminated glass and a layer of ProSolar or ProSolar Shade double-strength glass. Add an Argon or Krypton gas fill along with the Super

Spacer system for advance energy-efficiency. In addition, laminated glass increases protection against forced entry, reduces noise transmission and inhibits harmful UV rays from entering the home.

Simonton Impressions offers regionally specific glass packages for the Northern, North-Central, South-Central and Southern climate zones to meet ENERGY STAR® performance levels.

Our most advanced Low E glass, ProSolar Shade is a spectrally selective glass that blocks damaging UV rays while allowing desirable light into the home. The unique formula with three layers of silver helps provide maximum solar heat control, fade protection, visibility and energy savings.

## 9800 Double Hung

Optional Super Spacer®

Dual Air Loks™

Color-matched Cam Lock

Denny Clip™ Pivot System

Curved Lift Handle

**Double-Lifetime Limited Warranty** Simonton Impressions®

windows and doors are backed by a Double-Lifetime Limited Warranty that covers vinyl, hardware, screens and glass units. In addition, all Simonton Impressions products include a 20-year accidental Glass Breakage Warranty and products with any of the Sensor Glass® packages carry a Lifetime Glass Breakage Warranty. See your Simonton Sales Representative for complete details.

Double Hung windows tilt in for easy cleaning, while Slider windows feature a lift-out sash panel to help with window maintenance.

**OPTIONS & FEATURES**

**Standard Interior/Exterior**
